

50 Ans de Mode et de Musique Françaises

After reading through the description of Fashions from the 50s-2000s, you will note that there is no page representing the trends of this decade.

- 1) Create a page representing the fashion styles and musical influences of the 2010s. Consider what musical star might be one of the biggest contributing factors of these styles. Draw, print out, or use magazines to create 1-2 models worth of outfits. Use color. (Use your picture dictionary for vocabulary and feel free to check the web for ideas of how to say any words we haven't learned).
- 2) Label the clothes on the model(s) with the name of each item of clothing, the material it's made-of, and the colors.
- 3) Create a description of the model in French. Use the verbs PORTER or METTRE. (Use the other decade pages as inspiration for your description.)
