

Information Touristique d'Une Région En France

You will be creating a brochure, website, guidebook, book, children's book, blog, etc... for a city or for one of the main attractions (ie... museum, castle, race track, etc...) within your chosen region. You will need to gather information about the location as well as visuals such as pictures or maps. You can also create a visual but you will need to do more than a few stick figures if you choose this route.

This project should be informational but also persuade readers to want to visit the location. You will need to include information such as: name, size, location in the country/region/city/ or department, what it is or what is in it, what a person can/can't do there, the weather, history or what it's known for, why a person should visit and what to expect if they do.

NOTE: You should NEVER use a translating device on the computer to do the work for you. The purpose of this project is so you can show me what YOU are capable of and have learned throughout this semester (and year). If you struggle with a particular word here and there I recommend using a classroom dictionary or the online dictionary: <http://wordreference.com>

Project Grading Rubric:

Content: (17 pts total)

1. Does brochure describe a particular location in France? (1) _____
2. Does Brochure include information about (16):
 - Location in France _____
 - What exactly this location is _____
